How the Ostrich Got Its Long Neck by Verna Aardema (1995 ...

The earliest fossils of ostrich-like birds are Paleocene taxa from Europe. Palaeotis and Remiornis from the Middle Eocene and unspecified ratite remains are known from the Eocene and Oligocene of Europe and Africa. These may have been early relatives of the ostriches, but their status is questionable, and they may in fact represent multiple lineages of flightless paleognaths.

ostrich bend his legs to drink some water, Crocodile swam down the river and asked for help whomever he met.

Bing: How The Ostrich Got Its

The ostrich lacks a bone where some of the flight muscles would be attached and its large feathers lack the intricate lateral hooking system found in birds that can fly. Though unable to fly, their large size and powerful legs enable them to run at over forty miles per hour for extended periods of time (the cheetah can only attain these speeds ...

How the Ostrich Got Its Long Neck by Verna Aardema ...

Ostrich chicks hatch from their eggs. Ostriches live in groups, called herds, generally made up of around 12 individuals. Males compete with one another for control of several females (or hens), and the winner becomes the leader of the herd.

How the Ostrich got its long neck - Bed and Beast

The female common ostrich lays her fertilized eggs in a single communal nest, a

simple pit, 30 to 60 cm (12–24 in) deep and 3 m (9.8 ft) wide, scraped in the ground by the male. The dominant female lays her eggs first, and when it is time to cover them for incubation she discards extra eggs from the weaker females, leaving about 20 in most cases.

How The Ostrich Got Its

How the ostrich got his long neck Many years ago the ostrich and his wife decided to start a family. His wife eventually fell pregnant and laid a large clutch of eggs. Although the ostrich loved his wife dearly, he was unfortunately not much help around the nest, leaving most of the parental duties to her.

Consider the Ostrich: Job 39 and God's Commentary on His ...

How The Ostrich Got His Long Neck Mr. Ostrich was a sober minded, serious husband, who was always willing to assist his wife in her family duties. "My Dear", he said to her one evening, when their large clutch of eggs seemed almost ready to hatch, "my black feathers can not be seen in the darkness, so I will guard our eggs by night, and at the same time keep them warm for you.

Tale

Ostrich, we find out, has such a long neck because it was foolish enough to put its head down the crocodiles throat to check on a bad toothache. Of course crocodile, being well a crocodile, did what only a crocodile would do and clamp its jaw down because it was hungry.

Ostrich egg - Wikipedia

How the Ostrich Got Its Long Neck - Kenyan Tale. The continent of Africa is in a shape of a parrot and under its tail lies a country of Kenya. Kenya is home to Mount Kenya, which is the second highest mountain in Africa, after Kilimanjaro. South of Mount Kenya lives a tribe of Akamba. They are known for their exceptional woodcarving skills and story-telling.
