Mikuni VM34SS a Guided Tour

As the throttle slide is pulled up almost all the way, the jet needle protruding from the bottom of the slide clears the needle jet and opens up a direct passage from the float bowl, through the main jet, directly into the mixing chamber. On round-slide carbs, this is the most direct route for the fuel, but it requires a lot of vacuum to work.

How to Videos | Mikunioz

- With Mikuni the tip of the needle never leaves the main jet orifice all the way through wide open throttle. Thus with the VM the needle is in play through wide open throttle.
- With the Amal, depending upon which groove the needle clip is in, the needle leaves the needle jet at approx. 3/4 throttle. It is no in play when tuning the main jet.

Dan's Motorcycle "Needle Jet Circuit"

The emulsion tube, jet removed: Use a flathead screwdriver whose shaft doesn't flare out - it'll have to reach down through a narrow tube and still be a good fit, so a flathead that flares out isn't going to cut it. The Kincrome 100mm x 4mm #32010 is a good match. The emulsion tube:

Vintage Bike Magazine » Amal - A comprehensive look

Both the Mikuni Primary and Bleed type Needle Jets are put in through the throat of the Carburetor and are held in the proper position by a pin and locked in position but the Main Jet and a washer of some kind. The Keihin type Needle Jet is held in by screwing the Needle Jet into the Carburetor.

How to remove the jets, emulsion tubes and needle jet ...

And why there is a mismatch if changing the main jet effect midrange throttle.

Mikuni Needle Jet Removal How

The JET NEEDLE is a tapered rod that is pulled out of the NEEDLE JET as the throttle is opened and the THROTTLE SLIDE is pulled out of the VENTURI. Fitted with grooves along its top, the exact position of the NEEDLE JET is varied to control the fuel/air mixture. The NEEDLE JET is positioned by a CIRCLIP that secures the NEEDLE JET to the NEEDLE SLIDE.

Needle Jet (Emulsion tube) | Mikunioz

The needle jet on the VM34SS is not standard Mikuni fare, it's a two piece thing

with part stuck up inside the carburetor. The assembly is removed by unscrewing the needle jet pipe from the carburetor body, the main jet is screwed into the needle jet pipe. The needle jet pipe does not adjust the mixture, that is the function of the main nozzle.
