Study Guide - Reproductive System (KEY)

Study Guide - Answer Key Reproductive System 1. Distinguish between a gamete and a gonad using specific examples from the male and female systems. Gonads are the organs of the reproductive system that produce the gametes (haploid sex cells) Male gonads are the testes that produce sperm which are the male gametes

Reproduction Study Guide Flashcards | Quizlet

An angiosperm is a plant that produces seeds within a fruit. Reproduction begins when the pollen from the anther is in contact with the stigma. Eventually the egg will be fertilized in the ovule that is in the ovary and turn from a zygote to an embryo inside the seed. The life cycle of angiosperms among the different species is very similar: Pollination, fertilization, and the development of fruit.
