The Myth of Mental Illness - Wikipedia

Myth #6: Mental illness is a sign of weakness. Fact: Mental illness does not occur because of weakness. Many people who do not struggle with mental illness think that having a mental health condition somehow indicates that a person who does is weak. This stigma is due, in part, to the fact that mental illness cannot be seen or easily diagnosed.

4 of the biggest myths around mental health resilience

In 1961 Thomas Szasz published a book entitled *The Myth of Mental Illness*. In this book, he basically argued that the psychiatric diagnosis of "mental illness" was a self-serving act of ego-aggrandizement and obedience to the System. He said it quite bluntly when he said that "it is a lie, an error...a naive revival of the somatic error."
