A Zero Injury approach is a good business choice. It will only strengthen a company and make a better work place for those people that depend on the job to support their families.

Zero Injuries Is Not Your Goal -- Occupational Health & Safety

First, it is important to realize that "zero accidents" or any improvement in accident frequency or severity is a lagging indicator of safety. It is a result and not the process that produces it. It can be achieved through excellent performance but it also can be achieved by luck or a normal variation in accident occurrence.

Zero Accidents Injuries Are You

of any work-related accidents occurring should, and can, be reduced to zero. And in this book, Bob McCall challenges you—the leader—to zero out accidents. Challenge the status quo, prevent accidents, and plan ahead. Having a positive, sustainable impact on safety starts with you. In Zero Accidents and Injuries, you will learn how to:

Zero Accident Vision (ZAV) is a viewpoint stating that no one ought to be injured as the result of an accident in the workplace. More a school of thought than an actual numerical goal, in accident prevention terms, Zero Accident Vision proposes that all accidents can be prevented and offers a basis for learning from accidents and improving processes should they occur.

Implementing a Zero Accident Vision: 4 pillars of success

Zero injuries should not be your goal. Until leaders understand that there is a level of safety beyond zero, they will be stuck on the dreaded "hockey stick plateau" in their safety performance....

Child sues over catastrophic brain injury suffered in road ...

When the goal, programs and process are based on zero incidents, this translates as zero failures, thus promoting the mentality: Don't fail. Of course we do not want people to fail, but is this the motivation we truly desire: "Work hard to not fail?" When organizations establish Zero Incidents Injuries, this frames: Safety Excellence=Zero Incidents.
